2017-18 Winnebago Waterways
Lake Management Planning Project Framework

The project structure shown here provides a framework for the lake management planning process. While the basic structure of the framework will remain consistent throughout the project, Technical Team and Focus Group topics may change as new priorities or topics are realized. The framework was constructed in this way to accommodate the often dynamic process of developing a lake management plan for a large water body system.

Winnebago Waterways
Lake Management Planning

Steering Committee

Voting members:
- Winnebago County
- Calumet County
- Fond du Lac County
- Waushara County
- Outagamie County *(vacant)*
- FWWA
- Three members at large

Advisory members:
- WI DNR
- UW-Extension
- ACOE
- Tech Team leaders

Winnebago Waterways Committee

- County Executives/Administrators
- County Board Chairs
- County LCC Chairs

County representatives on the Steering Committee report to the Winnebago Waterways Committee (WWC). County representatives serve as the communication link between the Steering Committee and the WWC.

Steering Committee: The Steering Committee drives the project and is made up of 9 voting members and several non-voting advisory members. More than half of the voting Steering Committee members should be present to vote on a topic. Recommendations from the Technical Teams and Focus Groups will go through the Steering Committee before being passed on for final approval by the Winnebago Waterways Committee.

Technical teams are small groups of experienced conservation professionals. A Technical Team will be formed for each management topic. Technical Team leaders (one from each Team) will serve as advisory members on the Steering Committee.

Habitat, Fisheries and Wildlife Focus Group
